

The Educational Objective of this course is to help prepare dermatology residents for the Examination in Dermatopathology section of the American Board of Dermatology Examination. Other health professionals are also welcome.

StrataDx™ is a full-service pathology laboratory specializing in dermatopathology. We process and diagnose over 100,000 skin specimens a year. StrataDx is also a principal teaching site for the Harvard Dermatology Residency Program.

Led by two of the world's most renowned experts in dermatopathology, Drs. Geoffrey Gottlieb and Terence Harrist (representing over six decades of experience), the StrataDx team of eight board-certified dermatopathologists provides advanced diagnostics for a wide range of skin conditions and has helped to train fellows at some of the most prestigious medical education programs.

With the most comprehensive test menu available, we combine two distinct traditions in diagnosing all types of cutaneous disorders, including special expertise in dealing with complex pigmented lesions.
